

## Performance 8 In-Ceiling Speaker

QI1210

Qi80cp - round grilles (singly)

The Qi80CP is the flagship of the Performance In-ceiling range from Q nAcoustics. Like all Performance models it features a larger magnet assembly giving an increase in program power handling capability and combined with the larger cone size, improved bass performance. Precision components are utilized in the crossover filters, together with gold plated connectors and the beautiful Q Install magnetic grille design where the super slim bezel and narrow-mesh grille clips firmly into place. The major benefit of this grille design is that it makes a larger diameter in-ceiling speaker look much less obtrusive. As with all our nInstall products they feature protective driver dust covers and cloth backed grilles to facilitate painting. The HF is adjustable by + or - 3dB from a switch on the crossover.

### Specification

Tweeter:	Swivel/ 1" (25mm)
Woofers:	8"
Power handling (program):	15-80W
Impedance (nominal) ohms:	8ohm
Sensitivity:	88db
Response (low frequency):	-3 dB 55 Hz
Max rear depth:	97 mm
Cutout:	248 mm
Size-Round:	281 mm
