

Mobius3

Developer Series Invisible Loudspeaker

DATASHEET Rev. 1.1 | 01-10-19 | E&OE

amina

Product Description

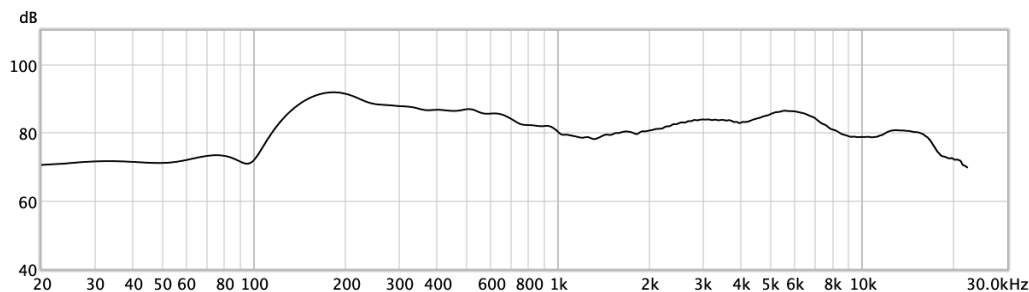

New to the Mobius range of fully-covered loudspeakers, the Mobius3 offers a smaller, low-cost alternative to the Mobius5 and 7 for use when there is limited stud/joist spacing, or in larger projects such as multi-dwelling units. The Mobius3 can also be used to supplement Mobius speakers within a large project, providing a cost-effective solution for lesser rooms such as spare bedrooms or hallways.

Rendered invisible behind a 2mm skim of plaster or other materials, the Mobius3 uses the same OptiDriver and OptiDamping technology found on the flagship Mobius7i invisible loudspeakers. Paired with a subwoofer the Mobius3 can be used for medium-level, full-bandwidth music listening at a highly competitive price point.

Example Applications

Invisible audio installations with space limitations. Distributed audio and medium-level listening within residential properties such as MDU's. Cost-sensitive commercial background music applications.

Frequency Response

Specifications

Mobius3

Nominal impedance	8 Ohms
Power handling (100 hour continuous/peak)	30W/60W
Sensitivity (2mm plaster/mud skim)	84dB 1m/2.83Vrms
Frequency response	112Hz - 20kHz (-6db)
Dispersion angle	180° x 180° (H x V)
Electrical connection	Blue butt-splice crimp terminals (14-16 AWG)
Dimensions	400mm x 300mm x 35mm (15 ^{3/4} " x 11 ^{13/16} " x 1 ^{3/8} "
Product weight	1.1Kg (2lbs 6oz)
Fixing requirements	BackboxCV300/SW300 or Mounting Blocks
In-line protection unit	APUi30C, APU-RS8iC or APU-RS16iC
Manufacturer limited residential warranty	10 years
